

The Auto-secure is a slam shut security rated front entrance door lock. Each locking position operates in the manner of a latch but when closed the spring loaded latch throws an additional 20mm to achieve a fully secure door.

SLAM SHUT SECURITY

- ✓ High security (tested to and achieved PAS24 specification)
- ✓ Dead bolts with 3 latches
- ✓ Spring loaded
- ✓ Deadbolt instead of hook for full engagement every time (no catching if door moves)
- ✓ See page 156-157 for Stainless Steel furniture

SPECIFICATION

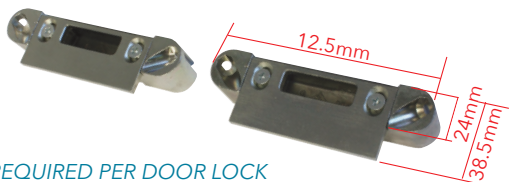

- 20mm faceplate
- 92mm centres
- 45mm backset
- 2 x latch deadbolt with 20mm throw
- 1 x deadbolt with 20mm throw
- 3 x lead in adjustable latch strikes with cross grain fixing for extra strength
- Single escutcheon on the outside lever handle on the inside

2 REQUIRED PER DOOR LOCK

TDKAUTO/LATCH Latch Keep

ELECTRONIC KEYLESS ACCESS

The Autosecure Multi-Point Locking System can be fitted with an optional Electronic Keyless Access (EKA) solution: from release by means of code keypad or finger scanner via opening by radio remote control.

The unique combination of multi-point lock and power transmission control makes it easier for installation and sets new standards for security and convenience.

Meeting VDS Class B, it exhibits robust security against break-in and unlocking attempts in combination with finger scanner control.
